

## Downhole Products Makes Successful Vietnam Event Debut

Downhole Products is celebrating a successful debut visit to a major oil and gas event in Vietnam.

For the first time, representatives of the global company attended the three-day ASCOPE Conference & Exhibition which this year celebrated its tenth anniversary and attracted thousands of visitors.

Commenting on the company's inaugural visit to the event, Downhole Products' manager for the Asia Pacific region Alex MacGregor said: "Last year saw our company open its first Vietnam office, based in Ho Chi Min City. This has been a major step forward because we now have a better grasp of the market, and our customers have appreciated having a local and technical support available to them.

"The interest generated both during and since the ASCOPE event has far exceeded our expectations. We are delighted to have received a number of positive enquiries and that three orders have been confirmed to date."

Established in 1994 and with its global headquarters at Portlethen near Aberdeen, Scotland, Downhole Products is a world market leader in the design, manufacture and supply of casing accessories and completion tools such as centralisers, reamer guide shoes and cable clamp protectors.
